All In Media's new premium radio station app

Our template app enables you to customise iOS and Android apps for your own radio station from a selection of themes and features.

The apps include a range of premium features as standard including now playing & schedule info, social media, RSS feeds, podcasts, contact the studio and an alarm clock, with new features and updates added frequently.

Manage Your Apps Online

Add stations and features, and instantly update your app using our online App Manager tool

Multi-station Support

Add new or pop-up stations to your app

Downloadable Content

Listen to podcasts and download them for offline listening

Contact the Studio

As well as sending texts, emails and calling your studio within the app, users can also record audio messages and send them to your station

Audio, Video & Banner Adverts

Use our ad system to deliver audio pre-rolls, splash screen and banner adverts within your app

Localised Language Support

The app can be customised to your own language

Social Media Feeds

Allow users to see and share content from your social media feeds on a single page

Push Notifications

Alert all of your app users immediately with the push of a button or send scheduled messages at a later time

Talk to us to find out how we've helped some of the biggest radio groups worldwide and what we can do for yours.
